

FLOURESCENCE SHIMMER REVERB

Shimmering Reverb Pedal with Intuitive 4-Knob Interface for Modern, Ethereal Reverb Sounds

- Shimmering, super-bright reverb pedal sends you straight to shoegaze heaven
- Effortlessly create celestial reverb sounds
- Intuitive 4-knob interface including dedicated shimmer knob
- True bypass for ultimate signal integrity
- "Built-like-a-tank" metal chassis
- Runs on 9 V battery or PSU-SB DC power supply (not included)
- 3-Year Warranty Program*
- Designed and engineered in Denmark

FLUORESCENCE SHIMMER REVERB is one of those effects you simply must add to your bag of tricks. Originally pioneered by recording legends Daniel Lanois and Brian Eno, shimmer reverb is produced by layering a tail of reverb (pitched up an octave) on top of the original dry signal. This produces lush soundscapes that take on a life of their own, ranging from voluptuous chimes, to interstellar travel-like sounds that will evoke memories of Carl Sagan's Cosmos while you're playing.

String Section in a Gig Bag

Used extensively by U2's The Edge, the shimmer effect has been adopted by scores of shoegaze guitar players to conjure up huge, vibrant soundscapes that burst with sparkling clarity. Ever since U2 released the album *The Unforgettable Fire*, produced by Eno and Lanois, shimmer reverb has found its way into classic performances, such as "With or Without You", "4th of July" and "City of Blinding Lights". Wherever there's a need for a grandiose string section to add body and scope to a passage, FLUORESCENCE SHIMMER REVERB fits the bill every time!

Control Simplified

With only 4 controls to master, FLUORESCENCE SHIMMER REVERB makes it easy to fine-tune your ethereal resonances in great depth. A Reverb knob adjusts the amount of tail on your dry signal for short or long resonances. The Mix knob lets you adjust the balance between the reverb tail and your guitar sound, while the Tone knob sets the amount of sparkle that's added to the reverb. Lastly, the Shimmer knob rolls in the perfect amount of sparkling, angelic octave tones to round out its thick and ethereal ambience.

Truly Roadworthy

FLUORESCENCE SHIMMER REVERB is built to withstand the rigors of the road with a sturdy metal frame and high quality components. True bypass circuitry keeps the integrity of your signal free from any tonal coloration, while top-mounted jacks make it easy to fit on any pedal board.

You Are Covered

We always strive to provide the best possible Customer Experience. Our products are made in our own MUSIC Tribe factory using state-of-the-art automation, enhanced production workflows and quality assurance labs with the most sophisticated test equipment available in the world. As a result, we have one of the lowest product failure rates in the industry, and we confidently back it up with a generous Warranty program.
