# SPECTRACOMP BASS COMPRESSOR

Ultra-Compact Multiband Compression Pedal for Bass with Built-In TonePrint Technology

- Ultra-compact multiband bass compressor offers you phenomenal tone and built-in TonePrint technology in a tiny form factor
- Advanced studio-quality compression algorithm is perfectly tuned to bass frequencies, giving a unified and balanced sound across your strings
- TonePrint-enabled to let you beam cool signature tones into your pedal with the free TonePrint App
- Design your own customized compression effects from scratch with free TonePrint Editor for PC, Mac\* and iPad\*
- Simple one-knob control lets you focus on playing
- True bypass allows for optimum clarity and zero high-end loss when the pedal is off
- High-quality components to give you a true studio-grade compressor in a pedal format
- Extra-small enclosure easily fits on any pedal board
- Sturdy die-cast metal case designed for life on the road
- 3-Year Warranty Program\*
- Designed and engineered in Denmark

## Dynamics Distilled

SPECTRACOMP BASS COMPRESSOR is the tiniest big thing to hit the world of bass in a long time. This ultra-compact and highly intuitive multiband compressor, is made to bring out all of the glorious low-end punch and presence of your beloved bass in the most transparent and musical way you've ever heard. Just turn it on and take charge of the groove.

- Studio-quality multiband compressor – perfectly tuned for bass
- TonePrint enabled
- Ultra-small footprint

## A Multiband Marvel

We first introduced the magic of multiband bass compression in our innovative RH-series bass amps, which made dialing in super-smooth compression an absolute breeze. With SPECTRACOMP BASS COMPRESSOR we've kept the simplistic one-knob approach from the amps, while greatly improving the compression algorithm. This gives you access to studio-quality compression tones, in a stompbox so small that you can't afford not to have it on your board.

## Honey, We Shrank the Studio

SPECTRACOMP BASS COMPRESSOR contains the same high-quality MD3 dynamics engine known from our studio production powerhouse, System 6000. A dynamics engine that has been used on countless hit-records and massive blockbuster movie productions. This advanced algorithm applies perfectly tweaked compression for your high, mid and low frequencies to create a more unified and balanced sound where your low strings never overtake your highs, something that's simply not possible with the one-size-fits-all compression known from a typical stompbox. This way you'll get a tight and punchy attack, with endless sustain all without ever compromising the natural low-end response of your bass.

## TonePrint – Deep Dynamic Editing

Picture SPECTRACOMP BASS COMPRESSOR as an ice cream. It's smooth, delicious and easy to love. But maybe you want to super-pimp your ice cream with cherries, chocolate sauce and sprinkles shaped like unicorns? You want to make that tone-sundae your own. This is where TonePrint comes into play. Via the free editor you can customize your own compression tone through a wealth of deep editing parameters, so it suits your rig perfectly. You can also try on custom pre-made tones via the free app for Android and iOS. Tone tweaking just leveled up.

## You Are Covered

We always strive to provide the best possible Customer Experience. Our products are made in our own **MUSIC Tribe** factory using state-of-the-art automation, enhanced production workflows and quality assurance labs with the most sophisticated test equipment available in the world. As a result, we have one of the lowest product failure rates in the industry, and we confidently back it up with a generous **Warranty program**.
