

VIBRACLONE ROTARY

Rotating Speaker Emulator with Simple 2-Knob Interface and Toggle Switch for Classic Rock Tones

- Dynamic emulation of the classic Vibratone® Rotating Speaker
- Easy to use 2-knob interface controlling intensity of speed and drive
- Toggle switch lets you choose between vintage-sounding Chorale or Tremolo setting
- True bypass for ultimate signal integrity
- “Built-like-a-tank” metal chassis
- Runs on 9 V battery or PSU-SB DC power supply (not included)
- 3-Year Warranty Program*
- Designed and engineered in Denmark

Every guitar player recognizes the thick, syrupy tones of their favorite '60s guitar heroes blasting their signature licks through a rotating speaker cone. Hendrix, Harrison, Trower, Gilmour, and too many others to list here – they all mastered the unique tone of the original rotating speaker. Now VIBRACLONE ROTARY brings that same lush, whirling effect to your pedal board, allowing you to explore everything from earthy and swampy to ethereal and spacy ambient sounds – all the way up to kaleidoscopic psychedelia!

Vintage Tone Spinner

The classic sound of those old rotating speaker systems may have life as an effect designed for the electric organ, but guitarists have always push the envelope when it comes to finding new tones. They soon found that when they plugged a guitar in and turned up the tone cabinet tube amps, a surprisingly sweet and dynamic overdrive sound was created – one that has been immortalized on myriad classic rock recordings.

Simple Controls – Authentic Response

VIBRACLONE ROTARY's Drive knob lets you dial-in that same sweetly organic and rich tube amp sustain accompanied by the lush modulation of a rotating speaker. You have the choice of either the slow and rich Chorale setting, or the fast, almost watery-sounding Tremolo setting – just like the original. Turn the Speed knob to adjust the delayed response from the pedal, which simulates the acceleration/deceleration of the speaker cone – once again, just like the real thing.

No Moving Parts

VIBRACLONE ROTARY is built to stand up to anything that a touring musician might demand from it. The built-like-a-tank metal frame houses the highest quality electronic components, and the top-mounted jacks make it a perfect fit for any pedal board. VIBRACLONE ROTARY also respects your unaffected tone thanks to true bypass operation. Another bonus – you won't need a muscular friend's help loading in or out!

You Are Covered

We always strive to provide the best possible Customer Experience. Our products are made in our own MUSIC Tribe factory using state-of-the-art automation, enhanced production workflows and quality assurance labs with the most sophisticated test equipment available in the world. As a result, we have one of the lowest product failure rates in the industry, and we confidently back it up with a generous [Warranty program](#).
